BEAUTY IS THE PURPOSE ENGINEERING IS THE METHOD

Totem Automobili is an entirely Italian house. Its design, its engineering and its style are born in Treviso, in an atelier that does not build in volume: every motor car is conceived for one person and shaped by hand until form and function become indistinguishable.

Its point of departure is the Italian grand tourer of the 1960s, the purest expression of an era when beauty led the way. Modern technology has given that icon a second life: the proportions endure, while everything beneath them moves forward with today's innovation.

Each commission begins as a conversation and ends as a signature: timeless lines, the finest materials and engineering that answers only to the road.

Italian Gran Turismo

A LEGEND, REBORN

Founded in 2018, Totem Automobili was born of a single conviction: that the purest Italian grand tourer of the 1960s deserved a future, not a museum.

The Totem GT keeps the silhouette that made an icon and redesigns everything beneath it from the ground up. Totem has created a monocoque in carbon fiber joined to aluminum subframes of exceptional strength, an entirely new suspension with double wishbones machined from solid aluminum, and a contemporary powertrain. The result brings the performance and safety of a modern motor car to a timeless shape.

A single platform gives life to two characters, the GT Electric and the GT Super with its twin turbocharged V6, each built to order and tailored to its owner, from the tone of the paint to the stitching of the seats.

The aesthetics of the past,
the technology of the present.

Concorso d'Eleganza Villa d'Este, 2026

RECOGNIZED WHERE IT MATTERS

In only a few years, the craftsmanship and expertise behind every Totem have earned the house its place at the great gatherings of the automotive world: Monterey Car Week, from The Quail and Motorlux to the Santa Lucia Preserve, Concorso Italiano and the Monterey Motorsports Festival; the Concorso d'Eleganza Villa d'Este and Como Car Week; and the 1000 Miglia Green, where the GT Electric was Guest Car in 2024.

Recognition has followed: the Villa Erba Public Award at Villa d'Este in 2024 for the bespoke GT Electric "Armonia"; runner-up in the Concept Cars & Prototypes class at Villa d'Este in 2026 for the "Rocket" Sport Prototipo; Best in Class and Best of Sound at the Concurso de Elegancia Costa del Sol in 2026.

Concurso de Elegancia Costa del Sol, 2026

Start button and front damping dial

THE ARTISANAL SOUL OF ELECTRIC GRAND TOURING

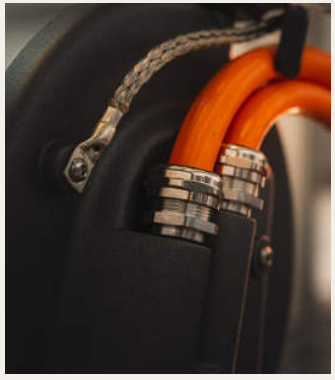

The GT Electric is the Totem GT in its most modern form. Torque arrives in an instant and without interruption, and the calm lets every detail of the road speak.

Several drive modes have been conceived for electric driving, each with its own power delivery map. The dampers can be set electronically on request.

Silent when you wish, vivid when you ask.

THE BATTERY
The modules of the 81 kWh battery pack.

HIGH VOLTAGE
High-voltage cabling for the electric system.

CONTROL
One of the electronic control units.

PROPULSION AND TECHNICAL DATA

2.9 s	590 hp	900 Nm	210 km/h	500 km	81 kWh
0–100 KM/H	POWER · 434 KW	TORQUE · 664 LB-FT	TOP SPEED, LIMITED	RANGE · 310 MI	BATTERY CAPACITY

POWERTRAIN & BATTERY

Traction	Rear-wheel drive
Differential	Limited-slip
Drive modes	Multiple, with dedicated power maps
Battery	81 kWh, twelve modules
AC charging	Type 2, up to 6.6 kW
DC charging	CCS, up to 90 kW

DIMENSIONS & WEIGHT

Length	4,274.5 mm (168.3 in)
Width	1,859 mm (73.2 in)
Height	1,316 mm (51.8 in)
Wheelbase	2,500 mm (98.4 in)
Weight	1,490 kg (3,285 lb)
Luggage	165 l (5.8 cu ft)

CHASSIS & RUNNING GEAR

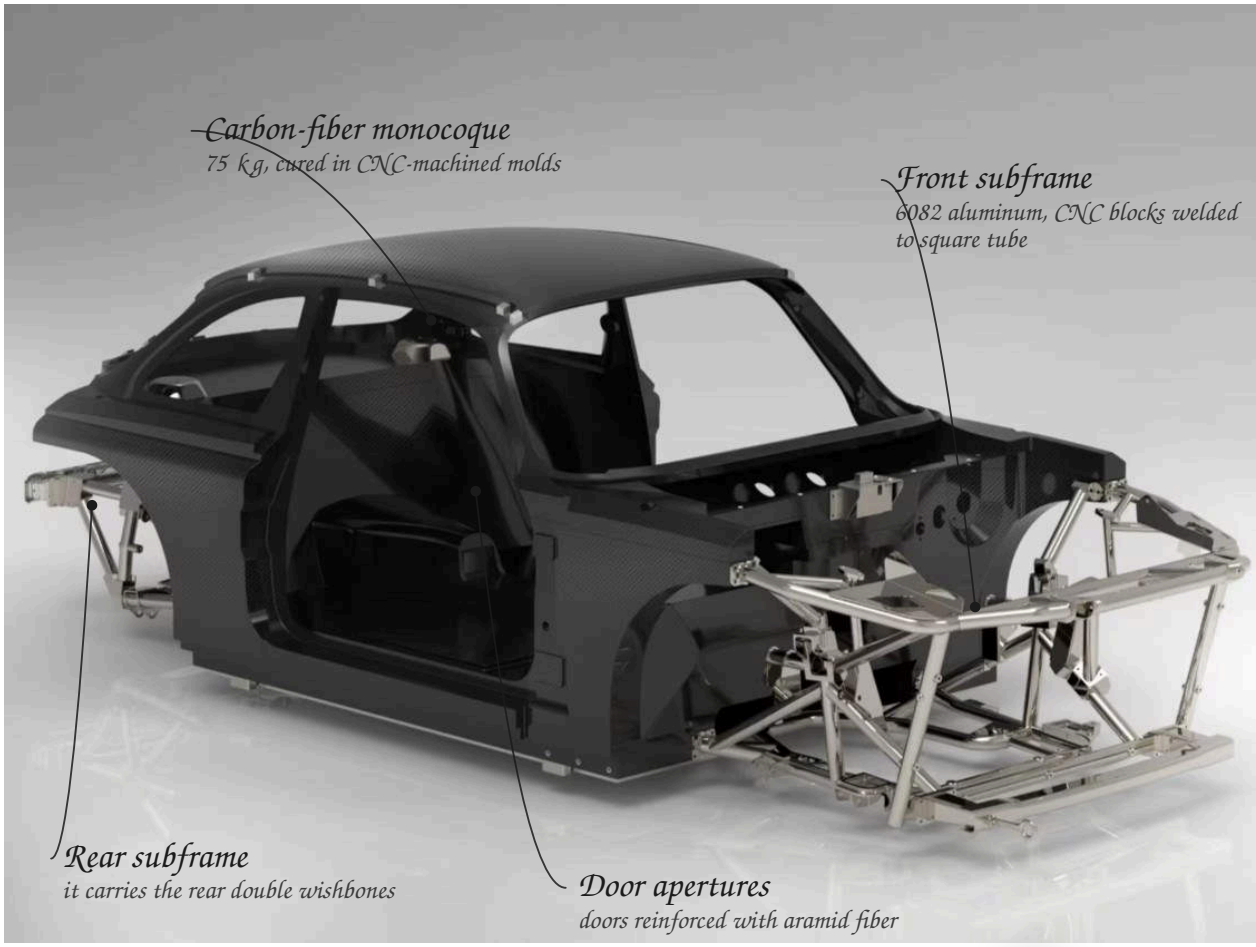

Structure	Carbon-fiber monocoque
Suspension	Billet aluminum double wishbones
Front brakes	6-piston monobloc, 355 mm discs
Rear brakes	4-piston monobloc, 345 mm discs
Wheels	18" billet aluminum monobloc

SPECIFICATIONS ARE INDICATIVE AND MAY VARY WITH CONFIGURATION

SCULPTED SKIN, CARBON ANATOMY

At the heart of every Totem GT lies a carbon-fiber monocoque developed by Totem and its specialist partners, from raw materials born of decades of aerospace research. Composite sheets are laid into CNC-machined assembly jigs for outstanding structural accuracy.

Validated through finite-element analysis to US and EU passenger-safety requirements, the shell is joined to high-resistance 6082 aluminum front and rear subframes. From high-precision milled molds, the wide body is rebuilt entirely in carbon fiber, as light as possible and perfectly smooth, its doors reinforced with aramid fiber. This new chassis architecture makes the car 10% larger than the original donor car.

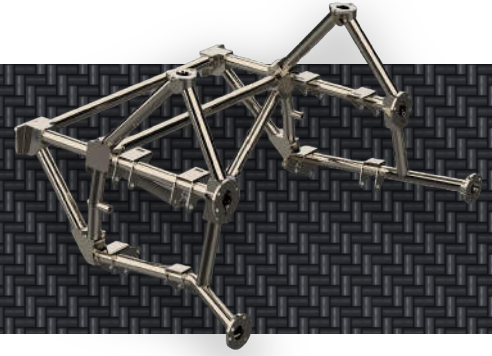

75 kg
CARBON-FIBER MONOCOQUE SHELL

US–EU
SAFETY REQUIREMENTS, VALIDATED BY FEA

100 %
CARBON-FIBER BODY PANELS

THE SUBFRAME

Machined from 6082 aluminum and welded by hand, one at the front and one at the rear, here on its own.

LAYOUT

Beneath the carbon-fiber bodywork, aluminum subframes carrying double wishbone suspension of Totem's own design at both axles. Every arm and upright machined from a solid billet so that the geometry does not change the geometry on the road.

SUBFRAMES

Double wishbones front and rear, machined from solid aluminum

DAMPERS

CNC-machined blocks welded to square-section tube

Coil-overs developed with ORAM, the Como specialist in all types and motor sport

ADJUSTMENT

Mechanical as standard. *On request:* ORAM electronic suspension, front and rear set independently. Five positions from two knobs in the cockpit

STEERING

Electric power steering as standard. *On request:* hydro-electric power steering, for a more natural, connected feel

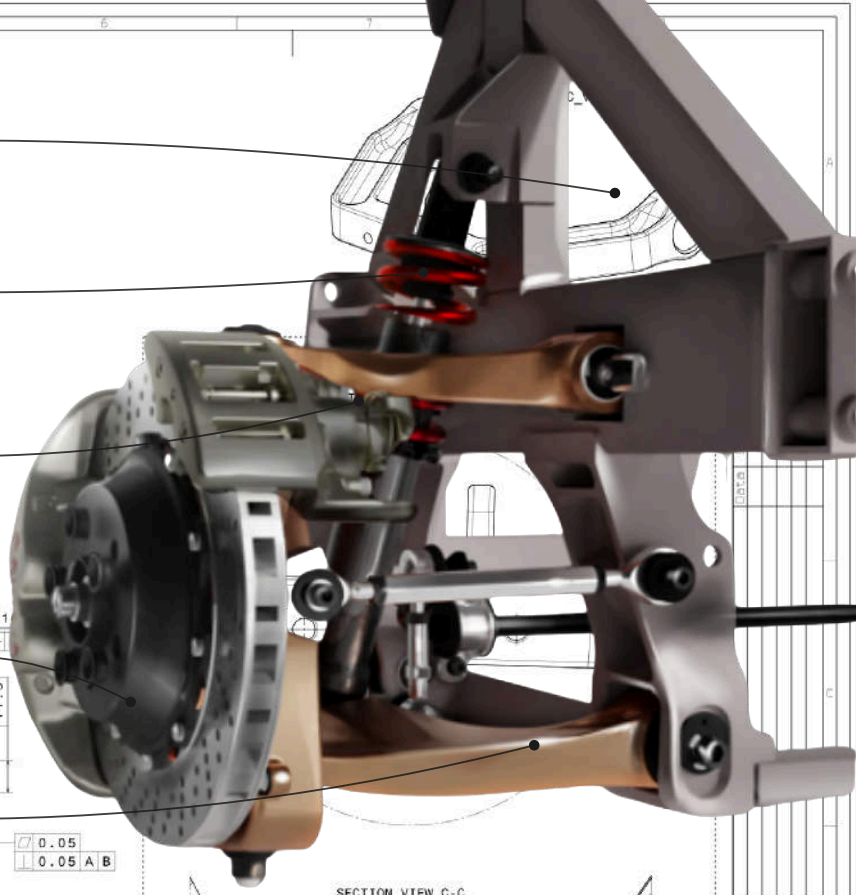

Subframe

On the assembly line

BRAKING, MADE TO MEASURE

Like everything on a Totem, the brakes are chosen for the way the car will be driven. Every GT Electric stops on Brembo aluminum monobloc fixed calipers, six pistons at the front and four at the rear, clamping cross-drilled, internally vented discs of 355 × 32 mm and 345 × 28 mm.

Three Brembo systems then refine that character to the owner's life, from elegant grand touring to the circuit.

SYSTEM	CHARACTER	FINISH
GT-M *Street to sport driving*	The most popular high-performance system: opposed-piston calipers and lightweight two-piece discs, cross-drilled or slotted, for precise modulation and strong resistance to fade.	*Red, black, white or bespoke*
GT-S *Street to sport driving*	Lightweight slotted discs for consistent stopping in every condition, above all on wet and slippery surfaces.	*Dark gray, red Brembo logo*
GT-R *Track-oriented*	Billet monobloc calipers from Formula 1 technology, nickel-plated against corrosion and made to withstand higher temperatures, without the noise or comfort penalties of a race system.	*Nickel, red Brembo logo*

TOTEM

A SIGNATURE IN LIGHT

Round lamps were the face of the great Italian coupés of the 1960s, and they remain the face of the Totem GT. Behind the classic outline, every light is LED.

The result is recognisable at a glance, by day and by night: modern efficiency inside a timeless design.

The outer rings of the headlights and tail lights, like the housings of the tail lights, are machined from solid and finished by galvanic treatment in the metal the client chooses.

FRONT

Headlights with daytime running lights, auxiliary units with position lights, side turn signals.

REAR

Tail lights with position lights and turn signals, third brake light.

FLAVORS, WITHOUT LIMITS

The color of a Totem must reflect the spirit of its owner. It may be matched to any sample the client brings to the atelier, or chosen from the Totem catalog, which ranges from the most historic Italian shades to contemporary tones, in pastel, solid, metallic and mica finishes and in double, triple and quadruple layers of exceptional depth.

INDIVIDUAL COLORS

Through the Totem Individual Program, the client and Totem Automobili develop together colors and special requests created for a single car and reserved to it.

THE TOTEM CATALOG

Printed colors are indicative.

Nero	*Faggio*	*Blu Olandese*	*Blu*	*Blu Francia*	*Blu Pervinca Metallizzato*	*Blu Medio*	*Azzurro Le Mans*	*Viola Atmosfera*	*Marrone Metallizzato*	*Rosso Amaranto*	*Prugna*	*Rosso*	*Rosa Antico*	*Arancio*

GALVANIC JEWELRY

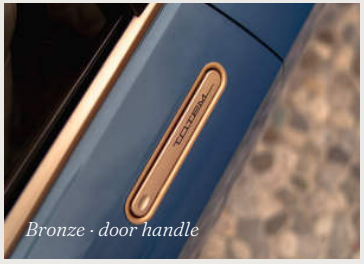

In counterpoint to the lacquer, every exterior brightwork element is finished in a galvanic tone of the client's choosing: mirrors, badges, door handles, grille shield and hinges, glossy or satin. The same palette may be carried into the cockpit, so that metal speaks one language throughout the car.

EXPOSED CARBON, WOVEN FOR TOTEM

Carbon fiber is not hidden at Totem, it is celebrated. The Carbon Fiber Pack, for the bodywork and for the cabin, is offered in the weaves shown alongside: the classic twill and two textures drawn exclusively for Totem, the herringbone Totem Design GT and the diamond-patterned Totem Design Wave.

Each weave is finished in a glossy, satin or matte lacquer, and can be tinted in any color, in the resin or in the clear coat; other patterns can be developed to measure for a single client.

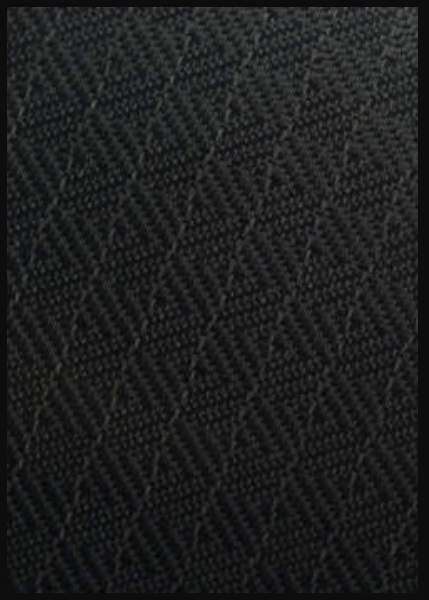

GLOSSY

Classic twill

SIGNATURE WHEELS

Two designs, each machined from billet aluminum as an 18-inch monobloc and available in any finish the client desires, a few of them shown below. Nowhere is Totem's attention to detail more visible. The GTA is also offered in a modular construction. They wear Pirelli P Zero or Michelin Pilot Sport tires as standard; for the circuit, the road-legal semi-slick Michelin Pilot Sport Cup 2 or Pirelli P Zero Trofeo R.

GTA

A 1960s competition icon, reimagined with a touch of Totem: a ring of round apertures around a deep, machined center.

Gold

Gunmetal

MILLERIGHE

A thousand fine radial lines: timeless modernity, drawing its inspiration from American heritage.

Aluminum

The machined barrel

EXTERIOR DETAILS

Beyond paint and brightwork, the body is finished to the owner's taste down to its smallest parts: the badge on the wing, the tint of the glass and the protection of the paint.

WING BADGES *The quadrifoglio, four ways*

As standard

CNC, painted ground

CNC, see-through ground

CNC, carbon-fiber ground

As standard: blue, green, yellow or black on white

Bespoke CNC badge
Machined from billet aluminum, its ground painted, see-through to the body color, or in carbon fiber

WINDOW TINT

Clear glass, as standard

As standard: clear

Fumé
A light smoked tint

Privacy
A dark tint for the rear windows

Green
The green tint of period glass

PAINT PROTECTION

Film, invisible on the paint

As standard: film on the wheel arches and side skirts

High-impact areas
Film on the most exposed areas of the body

Full body
Film over the whole body

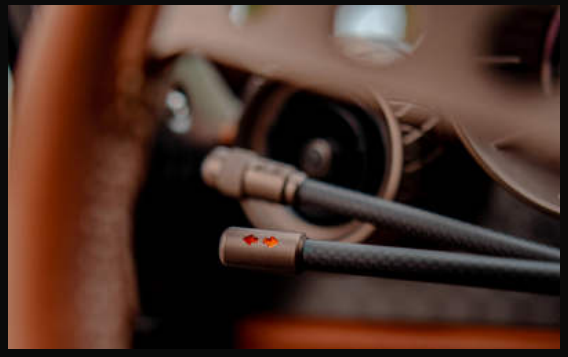

Interior carbon trim
Film on the carbon fiber of the cabin

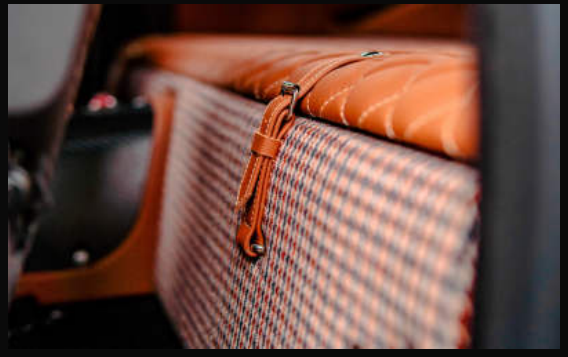

Ceramic treatment
A ceramic coating for depth and easier care

AN ANALOG SANCTUARY

To take the wheel of a Totem is to enter a space composed with a watchmaker's patience. Switchgear is machined from billet aluminum or formed in carbon fiber and finished by hand, and every hide is cut, stitched and fitted by our artisans.

Nothing here is incidental, not even the components no one will ever see. Instruments are round and legible, controls fall naturally to hand and every surface is chosen to be touched: a cockpit conceived for the pure pleasure of driving, of seeing and of feeling.

The plaque of the Totem Jarama

TOTEM INDIVIDUAL PROGRAM

A Totem should be as unique as the person who drives it. Through the Individual Program each client works with our design and engineering teams on a car of entirely bespoke technical and aesthetic character. There is no list of what may be asked for: each request is studied, engineered and crafted in our atelier.

TAG Heuer chronographs set into the dashboard, E.Marinella silks and leathers, a humidor fitted in the boot, a key machined from stainless steel and, on cars with a combustion engine, gear knobs made entirely to measure in any material desired. As everywhere else in the car, every wish can be granted, and the plaque records it.

A humidor in the boot

Ashtray in the door panel

A key machined from stainless steel

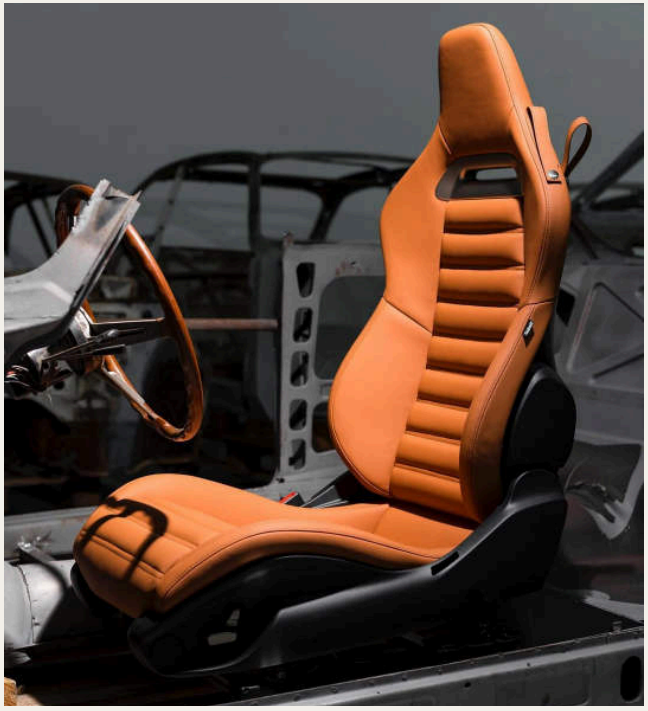

Silk inlay, E.Marinella

A bespoke overhead control pa… set in the leather

SEATING

Every Totem seat is shaped around the person who sits in it. Three characters, endless configurations: leathers, cloths, stitching and shells combine freely, a few of them shown here.

DOLCEVITA

Sabelt

The comfort seat, made by Sabelt for Totem to a Totem design: a sculpted shell with the signature horizontal pleats, electrically adjustable in six ways and upholstered to match the cabin, for long journeys.

CORSA

A carbon-fiber bucket pared back to the essential, with harness openings, deep lateral support and the lowest possible weight.

BESPOKE

Through the Totem Individual Program: bespoke inner trims, embroidered ribbons, silks and weaves, shaped around a single client.

THE FINEST LEATHERS, AND BEYOND

Chosen hide by hide, then cut and hand-stitched to measure, Totem leather reaches far beyond the seats. Four collections set the character of the cabin, from the printed-grain nappa of the Camelia to the drum-pigmented hides of the Extracampionario; each card follows, color by color.

CAMELIA COLLECTION

As standard · nappa, printed fiore grain

Nappa developed for the automobile, its fiore grain recalling the texture of the hide. Forty-eight colors.

PRIMOFIORE COLLECTION

Nappa, natural grain

The true surface of the hide, neither printed nor embossed. Ten colors, or dyed to sample.

EXTRACAMPIONARIO LUX

Natural leather, drum-pigmented

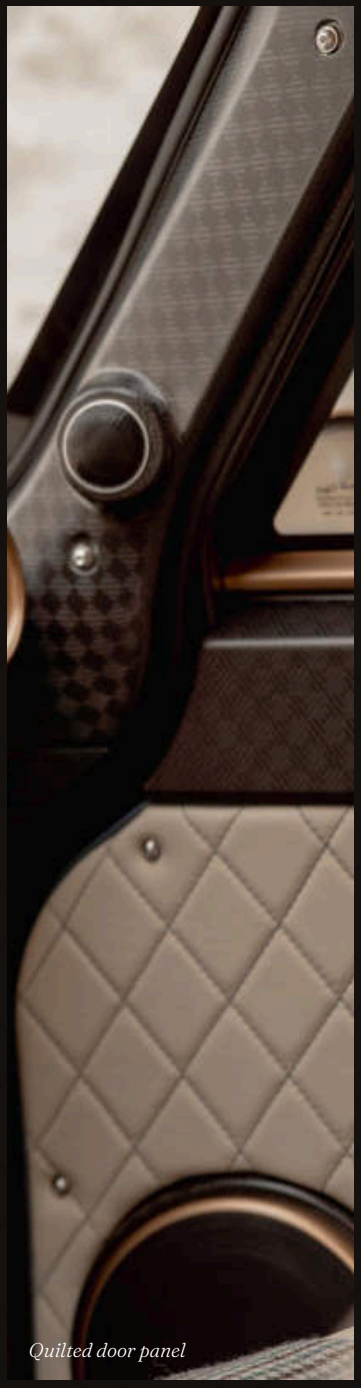

Pigmented in the drum for the greatest resistance to abrasion. One hundred colors.

EXTRACAMPIONARIO LORD

Natural leather, drum-pigmented

The finest and fullest hide of the range. Twenty-four colors.

Quilted door panel

Double stitching

Quilted rear bench

Leather and woven cloth

Embroidered ribbon

CAMELIA COLLECTION

AS STANDARD · NAPPA, PRINTED FIORE GRAIN

A compilation of nappa leathers developed specifically for the automobile, with a fiore grain that recalls the texture of the hide. Even from panel to panel and easy to live with, it is the leather of every Totem as standard, in the widest palette of the range.

LEATHER	Bovine nappa, European hides
GRAIN	Fiore grain, printed
THICKNESS	1.1–1.3 mm

EXTRA-CAMPIONARIO LUX

NATURAL LEATHER, DRUM-PIGMENTED

Beyond the sample card. Not a nappa but a natural leather, pigmented in the drum so that the color goes deep into the hide and the surface resists abrasion as no other leather of the range. A medium, regular grain and a full, brilliant color.

LEATHER	Natural leather, pigmented in the drum
GRAIN	Medium, regular
COLOR	Full and brilliant
ABRASION RESISTANCE	Maximum
COLORS	One hundred
TANNERY	ISO 9001:2015 certified

ALCANTARA AND DINAMICA

Two technical microfibers in place of leather, soft as suede and made for daily use. Either can dress the seats and the trim of the whole cabin, with stitching from the cotton card.

Seat in technical fabric, detail

Seat in technical fabric

Alcantara, the forty-six colors

Dinamica, the fifteen colors

ALCANTARA

A microfiber of polyester and polyurethane, made in Italy, with the soft touch of suede and the resistance of a technical material. Forty-six colors.

COMPOSITION	About 68% polyester, 32% polyurethane
COLORS	Forty-six
CERTIFICATIONS	ISO 9001, ISO 14001, ISO 45001, ISO 50001

DINAMICA

A microfiber made partly from recycled polyester, by a water-based process without solvents. Fifteen colors.

WEIGHT AND THICKNESS	300 g/m², 1.10 mm
ABRASION	50,000 Martindale cycles

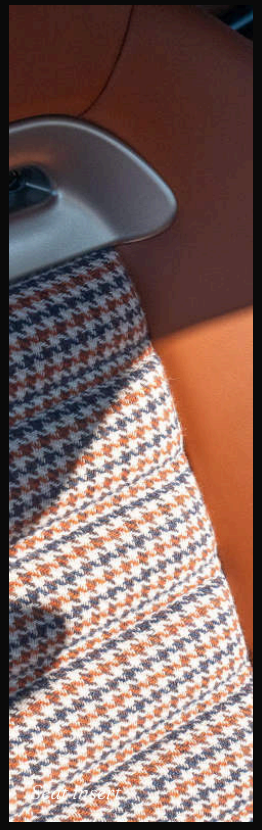

The cloth, close up

SIGNATURE PIED-DE-POULE

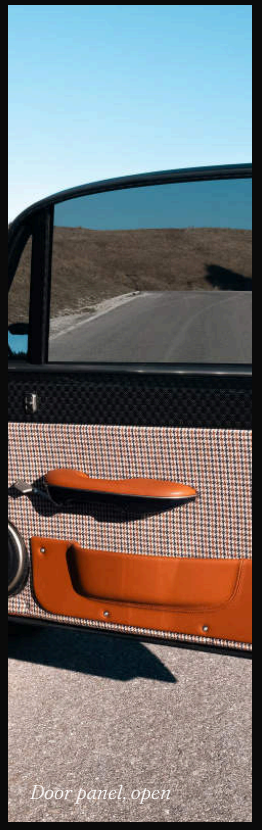

The cloth that has become a Totem signature: a pied-de-poule in warm reds, browns and dark green, woven to sit between the paint and the leather. It dresses the seat inserts and the door cards, and frames the cabin in the colors of the car.

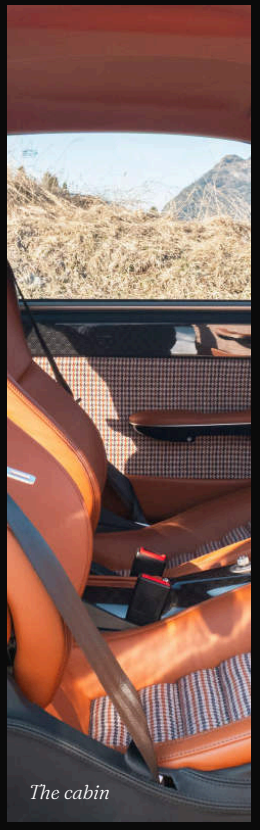

Door card

Door detail

Door panel, open

The cabin

OTHER FABRICS

Beyond the signature cloth, any fabric can be chosen for the seats and the door cards: suede, a weave from the great Italian mills such as Limonta Interiors, a tartan, or a cloth of the client's own, each tested for safety and durability.

Suede

Limonta Interiors

Fabric to follow

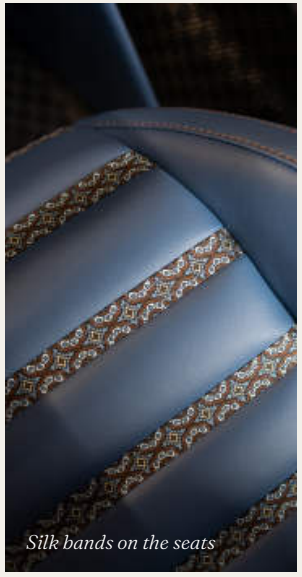

Fabric to follow

E.MARINELLA PACK

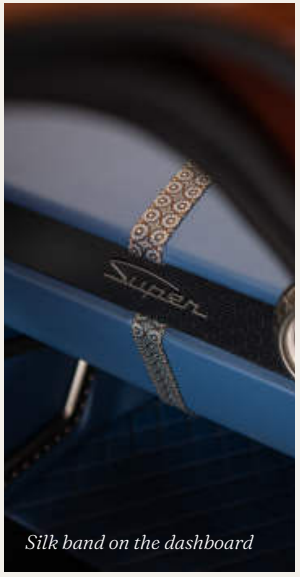

With the Neapolitan maison E.Marinella, silk enters the cabin. Its patterns, drawn from the heritage archive, run as inserts through the seats, the door pulls and the dashboard; the ties, a leather tie rack on the parcel shelf and the weekenders are made from the same silks and leathers chosen for the car.

A cabin with the E.Marinella Pack

Advanced sound insulation
Reduced noise for greater comfort on long journeys

THE KEY

As standard: CNC-machined aluminum

CNC stainless-steel key
Machined from stainless steel in place of aluminum

STEERING WHEELS

Every Totem steering wheel is built around a core machined from solid aluminum, its structural soul. From there the possibilities multiply: rim materials, leathers and stitching, carbon fiber and wood, spoke and hub finishes, all composed to match the cabin. The Totem Indy is fitted as standard; the Totem Design, the Hellebore and the Wood Design are offered alongside it.

TOTEM INDY

Inspired by the racing cars of the past: slender drilled spokes around a billet-aluminum core, and a rim in leather or technical fabric stitched to match the interior.

TOTEM DESIGN

Machined from a single 32 kg block of aluminum on a five-axis CNC for more than thirty hours, its rim inlaid with leather and carbon fiber.

BESPOKE

Through the Totem Individual Program: rims in wood, carbon fiber or any hide, with bands, stitching and spoke and hub finishes designed for one client alone.

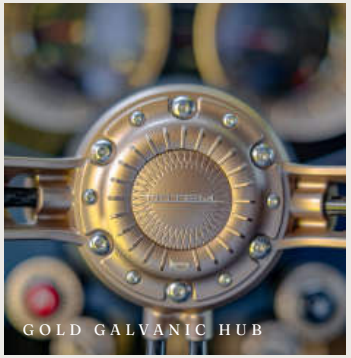

MACHINED FROM SOLID

A 32 kg billet, more than thirty hours of five-axis CNC

WOOD, CHOSEN FOR ITS GRAIN

On the bespoke Totem wheel, solid wood forms the rim, set between sections of hand-stitched leather and fixed with machined studs. Each piece is selected for its figure and finished to suit the rest of the cabin.

The grain, between machined studs and a bronze inlay

SOUND, TAILORED

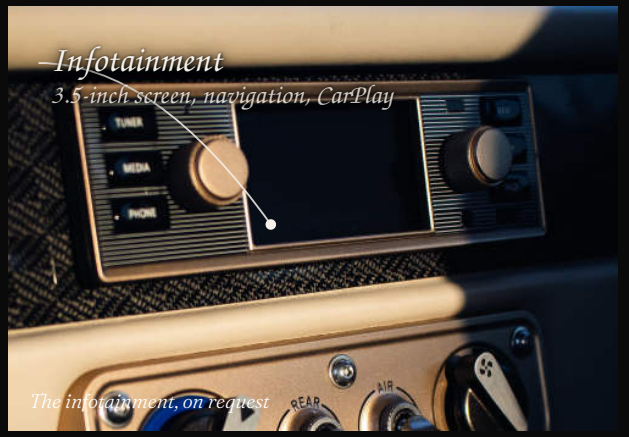

Music in a Totem is part of the design, never an addition to it. As standard, a radio of vintage look with DAB+, FM and Bluetooth sits within the dashboard among the machined controls; on request, an infotainment unit of the same style adds a 3.5-inch screen with navigation and USB, also offered with Apple CarPlay. Every speaker is set behind panels dressed in the same cloth and leather as the cabin.

The Hi-Fi system by Audio Development places two 165 mm woofers in the doors and two tweeters in the A-pillars.

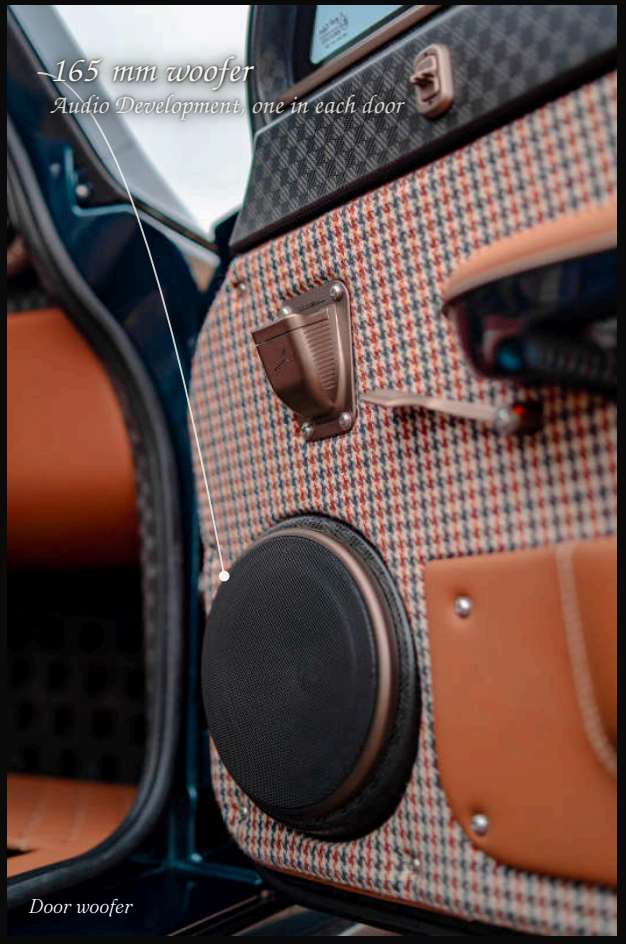

On request, the Subwoofer Extension adds two subwoofers behind the seats, bringing depth and weight to every journey.

The radio, as standard

The infotainment, on request
